----------	--------------------------	-----------	--------

Product Specifications

Flaked barley is unmalted, dried barley which has been rolled into flat flakes. It imparts a rich, grainy flavor to beer and is used in many stouts. It also improves head formation and retention.

Corn that has been cooked (to gelatinize the starches) and flaked. Use to lighten up the color of an American-style lager or to boost alcohol without affecting color or adding increased maltiness.

Use up to 30% of grist total for a distinct full-bodied flavor and creamy texture.

Flaked Rice lightens the body and increases crispness of a beer.

Add up to 10% rice hulls to enhance the filtration effectiveness of the lauter bed. Particularly beneficial when producing wheat beers.

Lends dry, crisp character and strong rye flavor. Use 5-10%.

Adds a "raw" wheat taste to wit beers, weiss. Adds some cloudiness, body, and head retention as well.

A whole kernel version of flaked wheat—increase head retention and body at as low as 8% of the grist, can make up to 40% of grist.

This is whole raw wheat that hasn't been malted - perfect for some traditional styles like Wit and Lambic.

Product Specifications

Vintner's Harvest Fruits has taken the hassle out of making fruit based wine and beer. Their line of fruit purees provide you with all of the fresh fruit flavor and character without the seeds, skins or crushing of solid packed fruit. Fruit Purees have been sterilized and are ready to use. The convenient 49 oz. (3 LB. 1 oz.) tins are easily converted into any recipe batch size.

Oregon Fruit Product aseptic puree in box packaging is in a sterile, ready-to-use bag, so you can simply pour the fruit puree into your system without further processing. Their aseptic fruit purees can be shipped at ambient temperature and stored in your cooler or on your production floor, saving you substantial frozen transportation and storage costs.

Should be stored refrigerated @ 32-50°F. Usage varies widely. Suggested starting rate is 9-18 oz. per barrel. Artificial inclusion (if applicable) is at a rate less than .1%.

Dried whole Chamomile flowers, from Egypt.
 Dried 3" Cinnamon sticks, Cinnamomum cassia from Indonesia.
 Dried whole seeds of Coriander, Coriandrum sativa from USA.

Dried Elderberries, from Bulgaria.
 Wild-harvested Scottish heather. Cut tips with leaf and flower.

Dried juniper berries, Juniperus communis from Albania.
 Gives a citrusy, herbal aroma and flavor to Belgian ales.
 Dried 1/4 cut Licorice Root, Glycyrrhiza glabra from Greece.
 Dried peel of Curacao, or bitter oranges. From Morocco.

Dried peel of sweet oranges, Citrus Sinensis from Spain.

Wild-harvested in Ivory Coast, Africa. Also known as "Grains of Paradise."

Dried, cut Rosehips, Rosa canina from Belgium.
 Dried cut root of Sarsaparilla, Hemidesmus indicus from India.
 Dried whole Star Anise, Illicium verum from China.

Bulk quantities of herbs and spices are available by drop shipment from Brewcraft USA. Inquire with your CMG sales representative.

Jack Daniels Tennessee Whiskey Barrels

These barrels are freshly emptied prior to shipment but do not expect them to arrive with residual whiskey left in them. We can not guarantee that barrels will arrive wet or damp. Barrels are likely to leak a little bit for a few days upon filling. We will not replace any "lost" beer as a result of leaking barrels, we only replace the barrels. All barrels are approximately 4 years old at the time that they are emptied. To determine the barrel's age, you can check the fill date stamped on the barrel and add 4 years. We can ship in quantities from one barrel to a full truck load, four barrels per pallet.

Because these barrels are previously used, there is no guarantee of freshness or condition. All barrels are sold "AS IS."

Honey Comb Barrel Alternatives

Black Swan's "Honey Comb" Barrel Alternative offers brewers a unique choice in wood extraction. Each Honey Comb is toasted for maximum "barrel aged flavor" in as little as six weeks.

Barrel Packs (medium toast)

Available in 5, 15 and 30 gallon pack sizes.

Tank Packs (medium toast)

*Tank packs are available as a drop ship item only direct from Black Swan. Available in 10, 15 and 30 barrel pack sizes.

Wood Infusion Spirals

The Barrel Mill's Infusion Spirals are made of ultra premium American and French Oak - no sapwood, no bark, no knots. Their unique product design distributes Oak flavor evenly and fully in as little as six weeks. Both American and French Oak Infusion Spirals are available in Medium Plus Toast.

Oak Wood Chips

½-1 inch pieces, non-sterile. Use 8-32 ounces per barrel in beer. May be soaked in spirits or other flavorings before use. Use of a nylon mesh bag is recommended for containment. Available in American or French Oak.

ENZYMES

Item ID	Product Name	Unit Size	Price
1015-3*	Termamyl® BrewQ Endo-Alpha Amylase	1 quart	\$16.80

A classic top-fermenting yeast suited for brewing a range of German Wheat beers.
 Highly attenuative active dried brewing yeast suitable for a wide range of Belgian style ales.
 Bottom-fermenting active dried brewing yeast suitable for European lager and Pilsner type beers.
 A versatile active dried brewing yeast suitable for a wide range of British Ales.
 An active dried brewing yeast suitable for a wide range of hoppy and characterful English beer styles.
 An active dried brewing yeast suitable for a variety of full-bodied British ale styles.
 Active dried brewing yeast suited for American style ales.
 Active dried brewing yeast conferring neutral flavor characteristics for ales and lager style beers.
 A high-ester producing active dried yeast suitable for ciders of all types.

Produces low concentrations of fruity and estery aromas and has been described as neutral for ale yeast.

available while supplies last

A bottom fermenting lager yeast that produces highly desirable lager flavor characteristics.
 This strain will produce a nice aroma of esters and contribute to complexity of German style wheat beers.

Will ferment pure sugars to 20% ABV high quality alcohol base. Excellent for hard cider.

Yeast nutrient which includes amino acids. A great supplement if your yeast is low in nitrogen.
 Yeast nutrient which includes amino acids. A great supplement if your yeast is low in nitrogen.

A nutritional yeast supplement.
 A nutritional yeast supplement.

A nutritional yeast "energizer."

Product Description

Termamyl® is a heat stable alpha-amylase enzyme added to cereal cooking for the liquefaction (thinning) of starch in mashes. Rapidly breaks down gelatinized starch into sugars.
 Dosage Rate: 250 ppm, 112 grams/ 1,000 pounds of adjunct grain

* = not a stock item. available as a drop ship only. additional freight charges will be applied.

FINING AGENTS **FOB - SOUTH HOLLAND, ILLINOIS**

Item ID	Product Name	Unit Size	Price
Kick G	KICK Carrageenan G	10 kg	\$238.00
Kick T	KICK Carrageenan T	10 kg	\$199.00
Kick MT	KICK Carrageenan Micro-T	1 kg	\$67.00

Product Description

KICK Carrageenan® kettle finings are an effective way to improve flocculation and clarity in the kettle and throughout the rest of the brewing process. The active ingredient in KICK Carrageenan is kappa carrageenan, a high molecular weight polysaccharide derived from red seaweed. When added near the end of the boil, kappa carrageenan binds to haze-forming proteins and other small particles and flocculates rapidly resulting in improved wort and beer clarity

KICK Carrageenan G: 100 percent granular kappa carrageenan. The particles are large, free flowing to facilitate ease of handling and low dust. Can be added to beer labeled as “organic” or “made with organic.”
 Typical Dose Rate: 10-60 ppm, 20 min before end of boil. Package Size: 10 kg box, polythene sealed liner.

KICK Carrageenan T: Refined kappa carrageenan in tablet form. The tablet format provides a convenient delivery method that encourages rapid disbursement in the kettle.
 Typical Dose Rate: 1 tablet (~30 g)/5 U.S. barrels (bbls), 20 min before end of boil. Package Size: 10 kg box, sealed nylon bag.

KICK Carrageenan Micro-T: Similar to the KICK Carrageenan T, but in a small tablet format.
 Typical Dose Rate: 1 tablet (~1 g)/5 gallons, 20 min before end of boil. Package Size: 1 kg box, sealed nylon bag.

Item ID	Product Name	Unit Size	Price
GR-BGHT-1K	Breakbright Tablets	2.2 lb	\$50.40

Available while supplies last.

Breakbright Super Tablets are an extremely convenient way to promote a bright and flocculent kettle break. Breakbright Super Tablets consist of kappa carrageenan derived from red seaweed. Simply drop these tablets into the kettle 10 minutes before the end of boil and experience brilliantly clear wort at knockout.
 Dosage Rate: 3 -5 grams/hl; 0.1 - 0.2 ounces/10 barrels

Item ID	Product Name	Unit Size	Price
1026-1	Nalco 1072 Kieselsol	1 Quart	\$15.75
1026-2	Nalco 1072 Kieselsol	1 Gallon	\$52.50
1026-4*	Nalco 1072 Kieselsol	555 Pounds	\$1,149.75

A 30% solution of SiO₂, Kieselsol is a purified colloidal solution of silicic acid (SiO₁) in water that has been specifically formulated for the rapid sedimentation of yeast and other haze particles in beer. Vegan friendly.

Item ID	Product Name	Unit Size	Price
770-B-1	Gelatin Clarifier	1 lb	\$7.35
770-C-1	Gelatin Clarifier	5 lb	\$42.00

A fining agent that also reduces astringency by removing tannin. Use 1/2 to 1 teaspoon per 5 gallons.

Item ID	Product Name	Unit Size	Price
1080- B-1	Irish Moss	1 lb	\$8.40
1080-C-1	Irish Moss	5 lb	\$35.00

Irish moss is a kettle fining derived from seaweed. Add 1 teaspoon per 5 gallons to the last 15 minutes of the boil to enhance cold break (protein coagulation).

Item ID	Product Name	Unit Size	Price
5S-MOSS4	Super Moss	4 lb	\$44.00
5S-MOSS8	Super Moss	8 lb	\$91.00

A purified form of carrageenan (Irish moss) that is more effective at coagulating and settling out haze-causing proteins in the brew kettle and primary fermenter. To use: rehydrate Super Moss in cooled wort to create a slurry, then stir in the slurry during the last 10 minutes of the boil and whirlpool the wort during chilling.

Item ID	Product Name	Unit Size	Price
GR-CRY-1LB	Cryofine - Dried Isinglass	1 lb	\$64.00

Cryofine is purified isinglass in a convenient powder form. It is added to beer at the end of fermentation to speed maturation and improve filtration by removing yeasts and protein particles.
 Package Size: 1 lb
 Dosage Rate: 1 - 5g/hl; 0.05 - 0.2 oz/10 bbls

Item ID	Product Name	Unit Size	Price
GR-SGL-50L	Britesorb A 100	50 lb	\$115.50

For chill proofing lighter style beers, Britesorb A 100 is the most effective choice that you can make. The surface of Britesorb A 100 is engineered with moderately sized pore openings that block the entry of larger foam-enhancing proteins. At the same time, the large surface area inside the pores ensures the absorption of virtually all proteins that cause chill haze.
 Dosage Rate: Beers up to 65% malt ratio: 40-50 grams/hl; 1.4 - 1.8 ounces/10 barrels
 Dosage Rate: Beers greater than 65% malt ratio: up to 80 grams/hl; 2.8 ounces/10 barrels

* = not a stock item. available as a drop ship only. additional freight charges will be applied.

Prefiltration of beer for microorganism reduction and particle removal.	6 - 15

Use in conjunction with DE as pre-coating for rough and polish filtration.

DE (Diatomaceous Earth) is a powdered filter aid.

A powder filter aid produced from volcanic rock which has been milled to specific grades.

10% silicone food - grade emulsion designed to control foam. Will work similar to Fermcap. Typical dosage is one ounce per seven barrels.

A vegetable oil anti-foam, effective in blow-off buckets. 1 oz. in a barrel will provide excellent foam suppression for 14 days.

WATER TREATMENT **FOB - SOUTH HOLLAND, ILLINOIS**

Item ID	Product Name	Unit Size	Price
5S-FIVE2-7	5.2 pH Stabilizer	7 lb	\$57.00
5S-FIVE2-2	5.2 pH Stabilizer	15 lb	\$104.00
5S-FIVE2-4	5.2 pH Stabilizer	40 lb	\$262.00

Product Description
 5.2 is a proprietary blend of food-grade phosphate buffers (similar to brewer's salts) that will lock in your mash and kettle water at a pH of 5.2 regardless of the starting pH of your water. 5.2 is safe for your mash and WILL NOT add any flavors to your beer. 5.2 will provide consistency of pH in any water conditions, but the most significant gains will be obtained if you are brewing in hard water. Use 5.2 to optimize your enzymatic activity in your malt, help clarify your wort, and achieve more consistent hop utilization. Use 1/3 oz. per 5 gallons of water.

Item ID	Product Name	Unit Size	Price
5S-CCHL50	Calcium Chloride	50 lb	\$105.00

Used to lower mash pH; 1 gram per gallon adds 72 ppm calcium, 127 ppm chloride.

Item ID	Product Name	Unit Size	Price
5S-CSUL50	Calcium Sulfate (Gypsum)	50 lb	\$44.00

Calcium Sulfate (Gypsum) adds permanent hardness (calcium ions) to brewing water; 1 gram per gallon.

Item ID	Product Name	Unit Size	Price
5S-CIT8	Citric Acid	8 lb	\$41.00
5S-CIT50	Citric Acid	50 lb	\$156.00

Used to increase acidity. One teaspoon per gallon will increase acidity by 0.1%.

Item ID	Product Name	Unit Size	Price
5S-LA4	Lactic Acid	4 x 1 gallon	\$166.00

Used to lower pH of sparge water. 88% solution.

Item ID	Product Name	Unit Size	Price
5S-MGSF50	Magnesium Sulfate	50 lb	\$67.00

Used to add sulfate and magnesium ions to brewing water.

Item ID	Product Name	Unit Size	Price
5S-PHA4	Phosphoric Acid	4 x 1 gallon	\$148.00

May be used to lower sparge water pH. 10% solution.

BOILER TREATMENT

Item ID	Product Name	Unit Size	Price
5S-BT-5	Boiler Treatment Liquid	5 gallon	\$67.00

Formulated to control scale buildup and retard rust formation.

BOTTLING LINE LUBE

Item ID	Product Name	Unit Size	Price
5S-LBH-5*	Lube H	5 gallon	\$76.00

A quality conveyor lubricant for hard water areas.

PROPYLENE GLYCOL

Item ID	Product Name	Unit Size	Price
5S-GLY5	Propylene Glycol	5 gallon	\$108.00

For use in glycol-cooled heat exchangers.

Product Description

A low foam detergent designed to rapidly attack scale and stone to leave metal surfaces sparkling and is especially formulated to passivate and re-passivate stainless steel.

Formulated as a keg cleaner to dissolve scale formation that develops with standard alkaline cleaners.

PBW (Powdered Brewery Wash) is a patented alkali cleaner originally developed for Coors, now widely used in commercial breweries across North America. Use 1 to 2 ounces per gallon for cleaning kettles, 3/4 ounce per gallon for fermenters, kegs, tanks, and other equipment. Soak equipment overnight in PBW solution; rinse the following morning - no scrubbing required! Will not damage rubber gaskets, soft metals, or your skin. PBW can effectively clean items that can't be reached with a brush or sponge, and is strong enough to remove thick, difficult, caked-on organic soils. PBW is environmentally friendly and biodegradable.

Star Super CIP is a highly chlorinated caustic cleaner developed specifically for the brewery industry. It is designed to be a low foaming CIP cleaner that will effectively remove protein soils as well as stains from lauter tuns and brew kettles at low concentrations. The amount chlorine in this product will control the bluing found on stainless steel after heat processing of protein based products.

H.D. Caustic #2 is recommended for use in spray washers and for cleaning pasteurizers, evaporators, and heat exchange surfaces. As a brewery cleaner, it is ideal as a kettle and lauter tun cleaner.

A liquid, gluconated, CIP caustic cleaner with a surfactant package.

A low temperature, liquid chlorinated, potassium hydroxide CIP cleaner.

Product Description

A chlorinated manual cleaner designed to be used with brush, spray or soak application.

A self-foaming liquid chlorinated cleaner.

A low foaming iodophor from Five Star Chemical. To sanitize, spray or immerse equipment with a fresh solution of 1 ounce IO-STAR to 5 gallons cold or lukewarm water (provides 25 ppm titratable iodine). Allow a one minute contact time. When ready to use, drain sanitizing solution. Does not corrode steel or copper.

A powerful iodine based sanitizer. Reduces spotting, filming and streaking in warm or cold water (not for use in hot water). This specially formulated no rinse sanitizer is odorless, tasteless and is easy on hands. Recommended Usage: 1/2 ounce of Iodophor for 5 gallons of cold water. Allow two minutes contact time. Allow to air dry.

For use in the circulation cleaning and final acid rinse of equipment such as tanks and fillers.

Quaternary Ammonia based sanitizer, disinfectant and deodorant.

An acid rinse, much like Star San, but low-foaming — this makes it great for CIP or pump applications as well as part soaking. Saniclean does not require a rinse when used at or below 200 ppm. Great for spray bottles, circulation sanitizing with a pump, or other applications where lots of foam is undesirable. Can also be used for soaking.

A high foaming, acid anionic, non-rinse sanitizer. Use 2 tablespoons per 5 gallons of water.

Stabilized chlorine dioxide which is a no rinse, odorless sanitizer.
